

# Software & App Development

Sympact

# Sympact are The Cloud Experts, and can develop online systems to bring simplicity, efficiency and automation to your business processes.

## Sympact offer the following types of development:

- ★ Custom (bespoke, ground-up) web-based software or iOS/Android app creation
- ★ Connection between custom software and third-party software
- ★ Connection between multiple third-party software packages
- ★ Re-building of existing systems with new efficiencies found through usage
- ★ Consultancy on the deployment of third-party software packages

## Our project portfolio consists of:

- ★ **Airline** Booking and Yield Management System, including Australia's first web check-in system.
- ★ National **Freight** Network Booking, Tracking, Invoicing and Management System with Agent and Client Intranets
- ★ Email Marketing System for a **Major Bank**, sending millions of newsletters to the bank's customers
- ★ Development of **Android and iOS Apps** used by over 60,000 users worldwide to access salary-related data
- ★ Cloud-Based Financial Document Deployment System for a nationwide **Home Loan Aggregator**
- ★ Links between Xero Accounting System, Microsoft Exchange (and Office365), Citrix Systems and other third-party packages
- ★ Survey system for **State Government** Transport Department
- ★ **Construction industry** measure and quote system
- ★ Advanced CMS Development including email marketing, online shopping, intranets and social media integration
- ★ Simple CMS Development for quick website deployment

## Project Capabilities:

- ★ Project Management, Scheduling, Testing and Deployment
- ★ Software Architecture
- ★ User experience and interface design

## Technical Capabilities:

- ★ LAMP Stack Development (Linux, Apache, MySQL and PHP and/or Perl)
- ★ Microsoft dotNet and Microsoft SQL
- ★ C# and C++
- ★ Javascript and JQuery
- ★ HTML5 and CSS3
- ★ API Bridge Development
- ★ Windows and Linux Servers
- ★ Server Virtualisation
- ★ Network Management

The Cloud Experts.
